Hiring Manager

Dear Hiring Manager,

I am writing to express my keen interest in a software engineering internship opportunity at your organization. As a final-year undergraduate pursuing a BICT (Hons) degree at the University of Ruhuna, I am passionate about software development and eager to gain hands-on experience in a dynamic and collaborative environment.

Over the past two years, I have developed over 30 real-world applications using technologies such as React, Node.js, Java, Python, C#, and .NET. My academic projects include a billing system using C# and MSSQL, a polythene factory management platform using MERN stack, and a Flutter-based Sinhala-English AI translator app powered by Gemini AI. These experiences have helped me strengthen both my front-end and back-end development skills, as well as my ability to build scalable and user-friendly solutions.

I have also worked with freelance clients on Fiverr, delivering full-stack solutions while maintaining a 5.0 client rating. My certifications in Azure, AWS, React, and GitHub Foundations have further expanded my knowledge in cloud computing, version control, and modern development workflows.

I am highly motivated to apply my skills in a real-world setting and learn from experienced professionals. I am confident that an internship at your company will provide the ideal platform for me to grow technically and contribute meaningfully to your development initiatives.

Thank you for considering my application. I look forward to the opportunity to further discuss how I can contribute to your team and gain valuable experience as an intern.

Sincerely,
H.P.G Lahiru Prasad
